TECHNICAL DATA SHEET PVC PLASTISOLS - Mold Release Type Adhesive

Chemfil produces a range of PVC based adhesives which demonstrate high mechanical and dielectric strengths, and high temperature chemical and thermal shock resistance. It is a high strength adhesive providing excellent adhesion base to the Filter paper. It is an effective replacement of the metal end cap used in Filters. It may also be used as a substitute for Polyurethane Adhesives. It is chiefly used in air filter applications.

USAGE

Apply a little silicon spray or mustard oil (mould release agent) on the dye at first The Adhesive is applied evenly on the metal dye on fixed specifications and Filter paper is put on it for polymerisation at 180 degree of hotness for 10 minutes on the hot plate. The surface should be held in position by contact pressure. It does not require any metal base plate. It lacks bonding content and serves as a hard base for the Filter paper. The dye is then cooled and the Filter is ploughed out with Plastisol as its base instead of a metal cap.

	PVC Adhesive Grades	2550/R
	Grade Name	Plastisol
S.N	Properties	
0.		
	Туре	Mold Release type
1	Color (range), before cure	White, Red, Black, Orange, Blue
2	Color, after cure	do
3	Viscosity , B - 8 Ford Cup	65 +- 25 seconds
4	Temp. Required in Degree C	200 to 220
5	Mold Release Agent – External	Required
6	Final Polymerisation	After 24 hours
7	Adhesion to metal dye	No Adhesion
8	Density, g/cc	1.50 +- 0.1 g/cc
9	Hot Oil Stability - (SAE-30) tested after 48 hours of curing in degree Celcius	N.A.
10	Shelf Life at 30 degree C	6 months
11	Recommended Usage	5 months
12	Hardness Shore "A"	55 +- 10

APPLICATION

	A specialist for manufacturing Air Filters by serving a base. A low cost replacement for Polyurethane adhesive.
Uner mousiry	Geo Grid in road construction, Sleeves for hand tools industry, Ceramic Tiles etc .

STORAGE & MATERIAL HANDLING INSTRUCTION

STORAGE

The material should be stored in cool and dry rooms for the stated period as long as they are hermetically sealed. Protect the material against moisture. Storing temperature : 25 - 30 degree C .

SAFETY MEASURES

Sufficient ventilation is recommended. Hands and eyes must be protected by gloves and goggles. In case of contact of the material with the eyes, rinse with plenty of water and consult a physician. Hands and tools should be cleaned before polymerisation. Wash contact areas of skin with soap and water.

SPILL OR LEAK PROCEDURES / WASTE DISPOSAL METHOD

If the material is spilled or leaked, absorb in Sawdust, Sand or other absorbent shovel up and remove to chemical waste disposal area.

Dispose of waste in Chemical waste in Chemical Disposal Area.

The information herein is furnished is given in good faith but without any warranty, and this also applies where proprietary rights of third parties are involved. It does not release you from the obligation to test the products supplied by us as to their suitability for intended processes and uses.

The application, use and processing of the products are beyond our control and therefore entirely your own responsibility. Should, in spite of this, liability be established for any damage, it will be limited to the value of the goods delivered by us and used by you. We will, of course, provide products of consistent quality within the scope of our General Conditions of Sale and Delivery.
